Constitutional Fragments
Societal Constitutionalism and Globalization
Gunther Teubner, Professor of Law, International University College, Turin, and Excellence Cluster “Normative Orders”, Goethe-Universität Frankfurt

- An original contribution to constitutional theory that shifts the terms of debate from reliance on state constitutions to constitutions of social fields
- Breaks new ground in the sociology of constitutional law, opening new avenues of research for the empirical study of transnational, private constitutional order
- Develops new applicable doctrines on the horizontal effects of human rights and conflicts of law in transnational regime collisions
- Presents a compelling argument for the application of constitutional norms in the private sphere as a solution to the current crisis of international governance

The powerful private sectors of the world economy remain largely unconstrained by fundamental constitutional rules, leading to human rights abuses on a massive scale. This book examines how the values of constitutional governance can be applied to the private sphere in the modern world, through a network of constitutional fragments.

Does the Constitution Follow the Flag?
The Evolution of Territoriality in American Law
Kal Raustiala, Professor, University of California Los Angeles Law School

The Bush Administration has notoriously argued that detainees at Guantanamo do not enjoy constitutional rights because they are held outside American borders. But where do rules about territorial legal limits such as this one come from? Why does geography make a difference for what legal rules apply? Most people intuitively understand that location affects constitutional rights, but the legal and political basis for territorial jurisdiction is poorly understood. In this novel and accessible treatment of territoriality in American law and foreign policy, Kal Raustiala begins by tracing the history of the subject from its origins in post-revolutionary America to the Indian wars and overseas imperialism of the 19th century. He then takes the reader through the Cold War and the globalization era before closing with a powerful explanation of America’s attempt to increase its extraterritorial power in the post-9/11 world. As American power has grown, our understanding of extraterritorial legal rights has expanded too, and Raustiala illuminates why America’s assumptions about sovereignty and territory have changed. Throughout, he focuses on how the legal limits of territorial sovereignty have diminished to accommodate the expanding American empire, and addresses how such limits ought to look in the wake of Iraq, Afghanistan, and the war on terror. A timely and engaging narrative, Does the Constitution Follow the Flag? will change how we think about American territory, American law, and—ultimately—the changing nature of American power.

Constitutionalism in Islamic Countries
Between Upheaval and Continuity
Rainer Grote, Senior Research Fellow, Max Planck Institute for Comparative Public Law and International Law, and Tilmann Röder, Senior Research Fellow, Max Planck Institute for Comparative Public Law and International Law

Constitutionalism in Islamic Countries: Between Upheaval and Continuity examines the question of whether something similar to an ‘Islamic constitutionalism’ has emerged out of the political and constitutional upheaval witnessed in many parts of North Africa, the Middle East, and Central and Southern Asia in order to identify its defining features and to assess the challenges it poses to established concepts of constitutionalism. This book offers an integrated analysis of the constitutional experience of Islamic countries, drawing on the methods and insights of comparative constitutional law, Islamic law, international law and legal history. European and United States experiences are used as points of reference against which the peculiar challenges, and the specific answers given to those challenges in the countries surveyed, can be assessed. Whether these concepts can be applied successfully to the often grim political and social realities of their countries will provide invaluable insights into whether such a fusion can be sustained, and may even pave the way for a new era of constitutionalism in Islamic countries.

Constitutional Referendums
The Theory and Practice of Republican Deliberation
Stephen Tierney, Professor of Constitutional Theory, University of Edinburgh

- The first full-length analysis of constitutional referendums, examining their democratic legitimacy and growing role in modern constitutional politics
- Provides a full analysis of the issues involved in referendum design, aiding constitutional lawyers and theorists working on the creation and operation of referendums
- Presents a diverse range of case studies to provide a comprehensive, inter-disciplinary account of the issues in political theory and legal and political practice which surround the recent proliferation of referendum use

The constitutional referendum has become a vital feature of modern constitutional-making and reform. This book provides the first full-length analysis of the theoretical foundations of constitutional referendums, assessing their democratic credentials and the design decisions that affect the value and legitimacy of the referendum process.
