Additional online resources ensure that the titles in the Fundamentals of Biomedical Science series fully support students, trainees and lecturers.

- Video guides to key experimental skills and methods help students master the essential skills;
- Interviews with practising biomedical scientists give a valuable insight into the reality of lab work;
- A powerful online Interactive Digital Microscope helps students gain a deeper appreciation of cell and tissue morphology.

Higher Education Bioscience Teacher of the Year

The Bioscience Teacher of the Year Award seeks to identify the UK’s leading bioscience university teachers and recognises the invaluable role they play in higher education, rewarding them with:

- the Ed Wood Memorial Prize of £1,000;
- one year’s subscription to an Oxford University Press journal of their choice, and;
- one year’s free Membership of the Royal Society of Biology.

We are proud to partner with the Royal Society of Biology and the Heads of University Biosciences in making this award available.

Oxford Chemistry Primers

Providing the perfect introduction to a diverse range of important topics in modern chemistry. Refreshed and updated to suit the needs of today's chemistry students, lecturers, and postgraduate researchers.

- Cutting-edge examples and applications show the relevance of the chemistry being described to current research and industry;
- New learning features, including questions at the end of each chapter and online multiple-choice questions, encourage active learning and promote understanding;
- Diagrams, margin notes, further reading, and glossary definitions also help to enhance a student's understanding of these essential areas of chemistry;
- The rigorous, yet accessible treatment of each subject area is ideal for those wanting to prepare for more advanced study or research.

Oxford University Press runs well-established student panels in bioscience, chemistry, and psychology.

Made up of students from the UK and Europe currently studying for undergraduate degrees in those subjects, the panels are a great opportunity for your students to have a say in our publishing plans, and gives us the chance to ensure our new titles and new editions truly meet their and your needs.

Students who join a panel will:

- provide feedback through email surveys;
- review chapters of new titles;
- take part in focus groups;
- earn credits to spend on OUP books of their choice;
- add a valuable experience to their cv;
- have their voice heard!

Visit the student panel pages on our website, and get your students to apply today.

Switched-on learning

Most of our textbooks publish with accompanying online resources. The resources are closely linked to the textbook, written by (or in conjunction with) our authors.

Designed to enhance the learning experience and save you time, these materials enable students to:

- get added value from their textbook;
- continue learning outside of timetabled sessions;
- stay updated and interact with the subject.

Our promise to you

Oxford University Press has a team of dedicated campus representatives who visit institutions across the UK, Europe and Middle East.

They are committed to providing a high level of service and support; from ensuring your conversations with them are constructive and helpful, to making sure the books your students need are delivered to the bookshops on time.

They will:

- consult with you to establish your requirements;
- provide you with relevant materials in the right format for you;
- ensure you are familiar with and have access to any accompanying online resources;
- offer live demonstrations of online resources to your students, at your invitation;
- provide you with the highest quality materials for your teaching needs;
- package textbooks together to ensure the best value for your students and department.

We don’t believe you’ll receive a better level of ongoing support from any other publisher.

Contact your campus representative at any time using the details opposite, or go online to find out who calls at your institution.

Oxford University Press is committed to supporting you and your students throughout their education. A continuing investment into science specific goodwill initiatives – from subject prizes, to nationwide competitions and awards – enables us to give something back.

- Reward your most deserving students with the Achievement in Biosciences, Achievement in Chemistry and Achievement in Psychology prizes – more than £10,000 worth of books is given to students across the UK and Europe each year through these awards.

- The Bioscience Teacher of the Year Award is a national award taking place annually which recognises top teaching talent. Candidates prepare case studies on teaching innovations and go through a rigorous judging process to win the title.

- Have your students considered getting their research published? Bioscience Horizons is a free online journal publishing the best undergraduate and taught masters bioscience research from around the world and is the perfect forum for them to showcase their work.

- Our bioscience, chemistry, and psychology student panellists from a diverse selection of institutions make a real difference to our publishing; their comments feed into live projects and development work.

To find out more about our programme of goodwill initiatives, please contact robyn.hewett@oup.com or visit the website: www.oxfordtextbooks.co.uk
