Oral, dental, and maxillofacial surgery represents one of the most common indications for anaesthesia worldwide. An understanding of this subject matter is fundamental to the safe practice of anaesthesia. The anaesthetist can be called upon to provide anaesthesia for patients presenting with impacted or carious teeth, infections of the mucosa and adjacent structures, facial injuries, head and neck cancers, salivary gland disease, facial disproportion, temporomandibular joint disorders, cysts, and tumours of the jaws. Anaesthetists may also be involved in managing patients experiencing chronic and intractable facial pain.

This book provides a comprehensive and detailed overview of all aspects of anaesthesia for oral and maxillofacial surgery. Designed for both consultants and trainees with an interest in this area, chapters cover the anatomy, pre-assessment, difficult airway, regional anaesthesia, imaging, and all clinical aspects of this complex area.
Dear Colleague,

Anaesthesia, Critical Care, and Pain Medicine titles 2012-2013 from Oxford University Press

The forthcoming year presents a wide range of new and indispensable titles in anaesthesia, critical care, and pain medicine.

Our Oxford Specialist Handbooks in Anaesthesia series continues to grow with the publication of Anaesthesia for Emergency Care, and SBAs and MCQs for the Final FRCA is the latest in our Oxford Specialty Training: Revision Texts series.

We’re also proud to announce the publication of Principles and Practice of Regional Anaesthesia, a new title in our Oxford Textbooks in Anaesthesia series. This fourth edition features a well-established author team, and discusses the place of regional anaesthesia in current medical practice, particularly with regard to pain processes, ultrasound imaging, and patient outcomes.

Why not visit our website to browse for more information and to see other books in these areas? You can search, create wish lists, and more – browsing and buying directly from OUP has never been so easy.

We are always happy to consider new book proposals in anaesthesia, critical care, and pain medicine. Please feel free to email me directly if you have a project you’d like us to consider.

Yours faithfully,

Chris Reid
Commissioning Editor

ANAESTHESIA FOR EMERGENCY CARE
Edited by Jerry Nolan, Royal United Hospital NHS Trust, Bath, UK, and Jasmeet Soar, Southmead Hospital, North Bristol NHS Trust, Bristol, UK

Covering a key area for anaesthetists, this book gives essential support for anaesthetic trainees for all cases they’re expected to anaesthetize while on call, both during the day and out of hours. The book also ties into the curriculum for the CCT in anaesthetics and it is covered in all three parts of the College’s CPD matrix.

OXFORD SPECIALIST HANDBOOKS IN ANAESTHESIA PAPERBACK / 978-0-19-958897-8 / £34.99 JUNE 2012 / 432 PP

SPINAL INTERVENTIONS IN PAIN MANAGEMENT
Karen Simpson, Ganesan Baranidharan, and Sanjeeva Gupta, Leeds Teaching Hospitals, Leeds, UK

Concentrating on techniques rather than pain pathology, Spinal Interventions in Pain Management is focused purely on the spine. This practical handbook covers anatomy and imaging, how to choose patients, how to undertake procedures, and includes advice on potential pitfalls.

OPHTHALMIC ANAESTHESIA
Edited by Chandra Kumar, Khoo Teck Puat Hospital, Singapore, Chris Dodds, James Cook University Hospital, Middlesbrough, UK, and Steven Gayer, University of Miami, Miami, Florida, USA

This book provides the reader with the basic knowledge of anatomy, the principles and specific anaesthetic techniques, and the changes in ophthalmic anaesthesia over the last decades.

THORACIC ANAESTHESIA
Edited by Jonathan Wilkinson, Northampton General Hospital, Northampton, UK; Nottingham University Hospitals, Nottingham, UK, Stephen H. Pennefather, Liverpool Heart and Chest Hospital, Liverpool, UK, and Robert A. McCoahan, Queen’s Medical Centre, Nottingham, UK

An essential reference for the core curriculum of the Fellowship of the Royal College of Anaesthetists, this book is an easily accessible, informative, and palatable guide to this complex subject.

OXFORD SPECIALIST HANDBOOKS IN ANAESTHESIA FLEXICOVERS / 978-0-19-956309-8 / £44.99 JULY 2011 / 786 PP

NEUROANAESTHESIA
Edited by Michael Nathanson, Queen’s Medical Centre, Nottingham, UK, Iain K. Moppett, University of Nottingham, Nottingham, UK, and Matt Wiles, Sheffield Teaching Hospitals NHS Foundation Trust, Sheffield, UK

This pocketbook provides clear guidelines on neuroanaesthesia and the management of head injuries. For FRCA candidates it is a unique source of information that can be annotated for personal learning needs.

STRUCTURED ORAL EXAMINATION PRACTICE FOR THE FINAL FRCA
Edited by Rakesh Tandon, Addenbrookes Hospital, Cambridge, UK

The book specifically addresses the new clinical emphasis in the FRCA examination, giving candidates an insight into the way the viva works, providing readily accessible information relating to a wide range of potential questions.

OXFORD SPECIALTY TRAINING: REVISION TEXTS
NOVEMBER 2011 / 352 PP

SBAS AND MCQs FOR THE FINAL FRCA
Edited by Rakesh Tandon, Addenbrookes Hospital, Cambridge, UK

Designed specifically for the revised Final FRCA examination, this book contains four mock exams, combining the new single best answer format with the traditional true/false format MCQs. A further fifth chapter contains only single best answer questions allowing candidates extra practice on this new and more difficult format.
