

CONTENTS

PREFACE xxi

1 MAKING ECONOMIC DECISIONS	2
Alternative Fuel Vehicles	2
A Sea of Problems	4
Simple Problems	4
Intermediate Problems	4
Complex Problems	4
The Role of Engineering Economic Analysis	5
Examples of Engineering Economic Analysis	5
The Decision-Making Process	6
Rational Decision Making	6
Ethics	15
Ethical Dimension in Engineering Decision Making	15
Importance of Ethics in Engineering and Engineering Economy	18
Engineering Decision Making for Current Costs	19
SUMMARY	21
PROBLEMS	23
2 ENGINEERING COSTS AND COST ESTIMATING	34
North Slope Natural Gas Pipeline	34
Engineering Costs	36
Fixed, Variable, Marginal, and Average Costs	36
Sunk Costs	39
Opportunity Costs	40
Recurring and Nonrecurring Costs	41

- Incremental Costs 42
- Cash Costs Versus Book Costs 43
- Life-Cycle Costs 43

Cost Estimating 45

- Types of Estimate 45
- Difficulties in Estimation 47

Estimating Models 48

- Per-Unit Model 48
- Segmenting Model 50
- Cost Indexes 51
- Power-Sizing Model 52
- Triangulation 54
- Improvement and the Learning Curve 54

Estimating Benefits 58

Cash Flow Diagrams 58

- Categories of Cash Flows 59
- Drawing a Cash Flow Diagram 59
- Drawing Cash Flow Diagrams with a Spreadsheet 60

SUMMARY 60

PROBLEMS 62

TRUST ME, YOU'LL USE THIS 70

3 INTEREST AND EQUIVALENCE 72

A Prescription for Success 72

Computing Cash Flows 74

Time Value of Money 76

- Simple Interest 76
- Compound Interest 77
- Repaying a Debt 78

Equivalence 80

- Difference in Repayment Plans 80
- Equivalence Is Dependent on Interest Rate 83

Nominal and Effective Interest 89

Continuous Compounding 93

- Single Payment Interest Factors: Continuous Compounding 93

SUMMARY 96

PROBLEMS 97

4 EQUIVALENCE FOR REPEATED CASH FLOWS 102**Anne Scheiber's Bonanza 102****Uniform Series Compound Interest Formulas 104**

Expanded Factors as Calculator Functions 110

Cash Flows That Do Not Match Basic Patterns 110

Economic Equivalence Viewed as a Moment Diagram 114**Relationships Between Compound Interest Factors 116**

Single Payment 117

Uniform Series 117

Arithmetic Gradient 118

Derivation of Arithmetic Gradient Factors 118

Reality and the Assumed Uniformity of A , G and g 123**Geometric Gradient 124****Compounding Period and Payment Period Differ 127**

Uniform Payment Series: Continuous

Compounding at Nominal Rate r per Period 129**Spreadsheets for Economic Analysis 131**

Spreadsheet Annuity Functions 131

Spreadsheet Block Functions for Cash Flow Tables 132

Using Spreadsheets for Basic Graphing 133

SUMMARY 135

PROBLEMS 137

5 PRESENT WORTH ANALYSIS 150**The Present Value of 30 Years of Benefits 150****Assumptions in Solving Economic Analysis Problems 152**

End-of-Year Convention 152

Viewpoint of Economic Analysis Studies 152

Sunk Costs 153

Borrowed Money Viewpoint 153

Effect of Inflation and Deflation 153

Income Taxes 153

Economic Criteria 154

Applying Present Worth Techniques 154

Useful Lives Equal the Analysis Period 155

Useful Lives Different from the Analysis Period 158

Infinite Analysis Period: Capitalized Cost 161

Multiple Alternatives 164

Bond Pricing 169

Spreadsheets and Present Worth 170

SUMMARY 172

PROBLEMS 173

6 ANNUAL CASH FLOW ANALYSIS 188

Are More Efficient Appliances Cost Effective 188

Annual Cash Flow Calculations 191

Resolving a Present Cost to an Annual Cost 191

Treatment of Salvage Value 191

Annual Cash Flow Analysis 195

Analysis Period 197

Analysis Period Equal to Alternative Lives 199

Analysis Period a Common Multiple of Alternative Lives 199

Analysis Period for a Continuing Requirement 199

Infinite Analysis Period 200

Some Other Analysis Period 201

Using Spreadsheets to Analyze Loans 203

Building an Amortization Schedule 203

How Much to Interest? How Much to Principal? 204

Finding the Balance Due on a Loan 204

Pay Off Debt Sooner by Increasing Payments 205

SUMMARY 206

PROBLEMS 207

7 RATE OF RETURN ANALYSIS 218

Bar Codes Give a Number; RFID Codes Tell a Story 218

Internal Rate of Return 221

Calculating Rate of Return	222
Plot of NPW Versus Interest Rate	226
Interest Rates When There Are Fees or Discounts	229
Loans and Investments Are Everywhere	231
Incremental Analysis	235
Present Worth Analysis	238
Analysis Period	241
Spreadsheets and Rate of Return Analysis	242
SUMMARY	244
PROBLEMS	245
Appendix 7A: Difficulties in Solving for an Interest Rate	255
Why Multiple Solutions Can Occur	256
Projects with Multiple Sign Changes	257
Evaluating How Many Roots There Are	259
Modified Internal Rate of Return (MIRR)	263
SUMMARY	265
PROBLEMS	266
8 CHOOSING THE BEST ALTERNATIVE	270
The Size of a Pipeline	270
Incremental Analysis	272
Graphical Solutions	272
Elements in Comparing Mutually Exclusive Alternatives	281
Doing a Set of Incremental Challenger–Defender Comparisons	282
Choosing an Analysis Method	284
Spreadsheets and GOAL SEEK	284
SUMMARY	286
PROBLEMS	286
9 OTHER ANALYSIS TECHNIQUES	296
Clean and Green	296

Future Worth Analysis 299

Benefit–Cost Ratio Analysis 301

Variations on the Theme of Benefit–Cost Ratio 305

Payback Period 309

Sensitivity and Breakeven Analysis 313

Graphing with Spreadsheets for Sensitivity and Breakeven

Analysis 318

Doing What-If Analysis with Spreadsheets 321

SUMMARY 322

PROBLEMS 323

10 UNCERTAINTY IN FUTURE EVENTS 334

Video Game Development and Uncertainty 334

Estimates and Their Use in Economic Analysis 336

A Range of Estimates 338

Probability 340

Joint Probability Distributions 343

Expected Value 345

Economic Decision Trees 347

Risk 353

Risk Versus Return 356

Simulation 357

Real Options 360

SUMMARY 361

PROBLEMS 362

11 DEPRECIATION 372

Depreciation and Competitiveness 372

Basic Aspects of Depreciation 374

Deterioration and Obsolescence 374

Depreciation and Expenses	375
Types of Property	376
Depreciation Calculation Fundamentals	376

Historical Depreciation Methods 377

Straight-Line Depreciation	378
Sum-of-Years'-Digits Depreciation	379
Declining Balance Depreciation	381

Modified Accelerated Cost Recovery System (MACRS) 383

Cost Basis and Placed-in-Service Date	383
Property Class and Recovery Period	384
Percentage Tables	385
Where MACRS Percentage Rates (r_t) Come From	387
MACRS Method Examples	388
Comparing MACRS and Historical Methods	390

Depreciation and Asset Disposal 390

Unit-of-Production Depreciation 394

Depletion 395

Cost Depletion	395
Percentage Depletion	396

Spreadsheets and Depreciation 397

Using VDB for MACRS	397
---------------------	-----

SUMMARY 399

PROBLEMS 400

12 INCOME TAXES 408

On with the Wind 408

A Partner in the Business 411

Calculation of Taxable Income 411

Taxable Income of Individuals	411
Classification of Business Expenditures	412
Taxable Income of Business Firms	413

Income Tax Rates 414

Individual Tax Rates	414
Corporate Tax Rates	416

Combined Federal and State Income Taxes	417
Selecting an Income Tax Rate for Economy Studies	418
Economic Analysis Taking Income Taxes into Account	418
Capital Gains and Losses for Nondepreciated Assets	422
Investment Tax Credit	422
Estimating the After-Tax Rate of Return	423
After-Tax Cash Flows and Spreadsheets	423
SUMMARY	425
PROBLEMS	425
13 REPLACEMENT ANALYSIS	440
The \$7 Billion Upgrade	440
The Replacement Problem	442
Replacement Analysis Decision Map	443
Minimum Cost Life of a New Asset — The Challenger	444
Defender's Marginal Cost Data	446
Do We Have Marginal Cost Data for the Defender?	448
Are These Marginal Costs Increasing?	448
Replacement Analysis Technique 1: Defender Marginal Costs	
Can Be Computed and Are Increasing	449
Replacement Repeatability Assumptions	450
Replacement Analysis Technique 2: Defender Marginal Costs Can	
Be Computed and Are Not Increasing	451
Replacement Analysis Technique 3: When Defender Marginal Cost	
Data Are Not Available	455
Complications in Replacement Analysis	456
Defining Defender and Challenger First Costs	456
Repeatability Assumptions Not Acceptable	458
A Closer Look at Future Challengers	458
After-Tax Replacement Analysis	459
Marginal Costs on an After-Tax Basis	459
Minimum Cost Life Problems	461

Spreadsheets and Replacement Analysis 463

SUMMARY 465

PROBLEMS 466

14 INFLATION AND PRICE CHANGE 476**The Athabasca Oil Sands** 476**Meaning and Effect of Inflation** 478

How Does Inflation Happen? 478

Definitions for Considering Inflation in Engineering Economy 479

Analysis in Constant Dollars Versus Then-Current Dollars 486**Price Change with Indexes** 488

What Is a Price Index? 488

Composite Versus Commodity Indexes 490

How to Use Price Indexes in Engineering Economic Analysis 492

Cash Flows That Inflate at Different Rates 493**Different Inflation Rates per Period** 494**Inflation Effect on After-Tax Calculations** 496**Using Spreadsheets for Inflation Calculations** 498

SUMMARY 500

PROBLEMS 501

15 SELECTION OF A MINIMUM ATTRACTIVE RATE OF RETURN 510**What's the Rate of Return on a Dam?** 510**Sources of Capital** 512

Money Generated from the Firm's Operation 512

External Sources of Money 512

Choice of Sources of Funds 512

Cost of Funds 513

Cost of Borrowed Money 513

Cost of Capital 513

Inflation and the Cost of Borrowed Money 514

Investment Opportunities	515
Opportunity Cost	517
Selecting a Minimum Attractive Rate of Return	518
Adjusting MARR to Account for Risk and Uncertainty	519
Representative Values of MARR Used in Industry	521
Capital Budgeting or Selecting the Best Projects	522
Spreadsheets, Cumulative Investments, and the Opportunity Cost of Capital	524
SUMMARY	527
PROBLEMS	528

16 ECONOMIC ANALYSIS IN THE PUBLIC SECTOR 536

From Waste to Power and Money	536
Investment Objective	539
Viewpoint for Analysis	540
Selecting an Interest Rate	542
No Time-Value-of-Money Concept	542
Cost of Capital Concept	542
Opportunity Cost Concept	543
Recommended Concept	543
The Benefit-Cost Ratio	544
Incremental Benefit-Cost Analysis	546
Elements of the Incremental Benefit-Cost Ratio Method	547
Other Effects of Public Projects	551
Project Financing	551
Project Duration	552
Quantifying and Valuing Benefits and Disbenefits	554
Project Politics	555
SUMMARY	556
PROBLEMS	557

17 ACCOUNTING AND ENGINEERING ECONOMY	564
The Two Faces of ABB	564
The Role of Accounting	566
Accounting for Business Transactions	566
The Balance Sheet	567
Assets	567
Liabilities	568
Equity	569
Financial Ratios Derived from Balance Sheet Data	569
The Income Statement	570
Financial Ratios Derived from Income Statement Data	572
Linking the Balance Sheet, Income Statement, and Capital Transactions	572
Traditional Cost Accounting	573
Direct and Indirect Costs	573
Indirect Cost Allocation	574
Problems with Traditional Cost Accounting	575
Other Problems to Watch For	576
PROBLEMS	576
APPENDIX A: INTRODUCTION TO SPREADSHEETS	582
The Elements of a Spreadsheet	582
Defining Variables in a Data Block	583
Copy Command	583
APPENDIX B: TIME VALUE OF MONEY (TVM)	
CALCULATORS	586
Advantages and Types of TVM Calculators	586
Notation for TVM Calculators	588
Examples with TVM Calculators and Tabulated Factors	588
PROBLEMS	593

APPENDIX C: COMPOUND INTEREST TABLES 594

APPENDIX D: FUNDAMENTALS OF ENGINEERING (FE)

EXAM PRACTICE PROBLEMS 626

PROBLEMS 628
