
FIGURE 9.5 Topographical Localization responses by a 50-year-old engineer who had been hemiparetic for 14 years since suffering a ruptured aneurysm of the right anterior communicating artery. Although only two of his responses are notably displaced (4 and 6), he betrayed left visuospatial inattention in an overelaborated set of compass points from which the West was omitted. From Lezak, M.D., Howieson, D.B., Bigler, E.D., & Tranel, D. (2012). Neuropsychological Assessment, Fifth Edition. New York, NY: Oxford University Press.
