

PHYSICAL GEOLOGY TODAY

PART I: THE SOLID EARTH

Chapter 1

Foundations of Modern Geology

1.1 Geology and the Scientific Method

1.2 The Birth of Geology

1.3 Geologic Time

1.4 Earth Materials: Minerals, Rocks, and Fossils

1.5 The Rock Cycle

1.6 Origin of Earth and the Solar System

1.7 Earth's Internal Heat

1.8 Earth as a System

1.9 What Does a Geologist Do?

Key Terms

Key Concepts

Study Questions

SCIENCE REFRESHER: Some Basic Concepts in Chemistry and Physics

IN DEPTH: Origin of the Universe – The Big Bang Theory

LIVING ON EARTH: Earth's Seasons – A 4.5-Billion-Year Legacy?

SCIENCE REFRESHER: The Flow of Heat

Chapter 2

Plate Tectonics

2.1 Continental Drift

2.2 Paleomagnetism

2.3 Seafloor Spreading

2.4 Subduction

2.5 Moving Plates and Plate Boundaries

2.6 Hotspots: A Plate Tectonic Enigma

Key Terms

Key Concepts

Study Questions

Living on Earth: The Remarkable Journey of the Green Turtle

In Depth: Failed Rifts

CHAPTER 3

Minerals

3.1 Elements: Building Blocks of Minerals

3.2 Minerals: Orderly Expressions of Matter

3.3 Physical Properties of Minerals

3.4 Silicate Rock-Forming Minerals

3.5 Nonsilicate Rock-Forming Minerals

3.6 Minerals and Rocks

3.7 Minerals and People

3.8 Minerals and Plate Tectonics

Key Terms

Key Concepts

Study Questions

Living on Earth: Origin of the Chemical Elements

Science Refresher: Some Basic Definitions in Science

Science Refresher: Solids, Liquids, and Gases

Chapter 4

Origin and Evolution of Igneous Rocks

4.1. Igneous Rocks and the Rock Cycle

4.2. Magma Formation and Transport

4.3 Textures of Igneous Rocks

4.4 Classifying Igneous Rocks

4.5 Evolution of Igneous Rocks

4.6 Volcanic Eruptions

4.7 Igneous Rocks and Plate Tectonics

Key Terms

Key Concepts

Study Questions

Science Refresher: Heat, Temperature, and Magma

Living on Earth: Volcanoes and the Air We Breathe

In Depth: Can Explosive Eruptions Be Predicted?

CHAPTER 5

Weathering and Soils

5.1 Weathering

5.2 Mechanical Weathering

5.3 Chemical Weathering

5.4 Soils

5.5. Weathering, Soils, and Plate Tectonics

Key Terms

Key Concepts

Study Questions

Science Refresher: What Is an Acid?

In Depth: The Role of Oxidation in Earth's History

Living on Earth: The Food Chain

CHAPTER 6

Sedimentation and Sedimentary Rocks

6.1 From Sediment to Sedimentary Rock

6.2 Types of Sedimentary Rocks

6.3 Classifying Sedimentary Rocks

6.4 Interpreting Sedimentary Rocks

6.5 Depositional Environments and Sedimentary Facies

6.6 Sediments, Sedimentary Rocks, and Plate Tectonics

Chapter Summary

Key Terms

Key Concepts

Study Questions

LIVING ON EARTH: Salt of the Earth

LIVING ON EARTH: King Coal

SCIENCE REFRESHER: Settling Velocities

CHAPTER 7

Metamorphism and Metamorphic Rocks

7.1 Metamorphic Rocks and the Rock Cycle

7.2 Factors That Control Metamorphism

7.3 Types of Metamorphism

7.4 Metamorphic Textures

7.5 Classifying Metamorphic Rocks

7.6 Metamorphic Zones and Facies

7.7 Metamorphism and Plate Tectonics

Key Terms

Key Concepts

Study Questions

SCIENCE REFRESHER: Pressure Units

IN DEPTH: Shock Metamorphism

IN DEPTH: Metamorphism and the Rock Cycle

PART II: EVOLUTION OF THE SOLID EARTH

Chapter 8

Geologic Time

8.1 Measuring Geologic Time: Relative and Absolute Ages

8.2 A Short History of Geologic Time

8.3 Relative Dating: Determining Chronological Order

8.4 Correlating Rock Strata

8.5 Relative Dating and the Geologic Time Scale

8.6 Absolute Dating: Finding a Geologic Clock

8.7 Absolute Dating and the Geologic Time Scale

8.8 A Sense of Time

8.9 Geologic Time and Plate Tectonics

Key Terms

Key Concepts

Study Questions

LIVING ON EARTH: Radioactivity and Radon Gas

SCIENCE REFRESHER: Types of Radioactive Decay

SCIENCE REFRESHER: Linear versus Exponential Relationships

IN DEPTH: The Quest for the Age of Earth

Chapter 9

Plates and Plate Boundaries

9.1 Plates on Earth's Surface

9.2 Plates and Isostasy

9.3 Plate Boundaries

9.4 Divergent Boundaries: Creating Oceans

9.5 Convergent Boundaries: Recycling Crust and Building Continents

9.6 Transform Boundaries: Fracturing the Crust

9.7 Hotspots: Tracking Plate Movements

9.8 Plate Tectonics and Plate-Driving Mechanisms

Key Terms

Key Concepts

Study Questions

Living on Earth: The Bizarre World of the Mid-Ocean Ridges

Living on Earth: Tsunami

In Depth: Ophiolites—Clues to the Structure of Oceanic Crust

Chapter 10

Deformation and Mountain Building

10.1 Deformation

10.2 Orientation of Geologic Structures

10.3 Fractures

10.4 Folds

10.5 Unconformities Revisited

10.6 Plate Tectonics and Mountain Building

10.7 Mountain Building in the Geologic Past

Key Terms

Key Concepts

Study Questions

In Depth: Partial Melting and the Making of Continental Crust – Nature’s Ultimate Recycling

Program

Living on Earth: In the Shadow of the Himalayas

Chapter 11

Earthquakes and Earth’s Interior

11.1 Heat and Density: Clues to Earth’s Interior

11.2 Earthquakes and Elastic Rebound

11.3 Seismic Waves

11.4 Journey to the Center of the Earth

11.5 Earth’s Structure and Composition

11.6 Circulation in Earth’s Interior

11.7 Plate Tectonics and the Fate of Subducted Slabs

Key Terms

Key Concepts

Study Questions

LIVING ON EARTH: Predicting Earthquakes – Some Lessons from California

SCIENCE REFRESHER: Density, Volume, and Seismic Velocity

SCIENCE REFRESHER: Wave Refraction

IN DEPTH: Earth's Magnetism and Its Dynamic Core

PART III: SCULPTING THE SOLID EARTH

Chapter 12

Mass Wasting

12.1 Mass Wasting: Downslope Movement

12.2 Factors That Influence Mass Wasting

12.3 Mass Wasting Mechanisms

12.4 Minimizing Mass Wasting Hazards

12.5 Mass Wasting and Plate Tectonics

Key Terms

Key Concepts

Study Questions

SCIENCE REFRESHER: Surface Tension, Sand Castles, and the Goldilocks Solution

IN DEPTH: Mass Wasting on the Moon and Mars

LIVING ON EARTH: The Oso Landslide, Washington State

Chapter 13

Running Water

13.1 Running Water and the Hydrologic Cycle

13.2 Streamflow

13.3 Stream Erosion

13.4 Stream Transport

13.5 Stream Deposition

13.6 Floods and Flood Prevention

13.7 Running Water and Plate Tectonics

13.8 Running Water on Other Worlds

Key Terms

Key Concepts

Study Questions

LIVING ON EARTH: The Death of the Aral Sea – An Environmental Disaster

IN DEPTH: Dams and the Human Exploitation of Surface Water

CHAPTER 14

Groundwater

14.1 Groundwater: A Vital Resource

14.2 The Water Table

14.3 Aquifers and Groundwater Flow

14.4 The Dissolving Power of Groundwater

14.5 Exploitation of Groundwater

14.6 Groundwater and Plate Tectonics

Key Terms

Key Concepts

Study Questions

SCIENCE REFRESHER: Water Pressure at Depth

LIVING ON EARTH: The Historical Importance of Aquifers

LIVING ON EARTH: Water in the Sahara Desert

IN DEPTH: Exploring for Groundwater

CHAPTER 15

Glaciers and Glaciation

15.1 Glaciers and Glacier Ice

15.2 Glacial Erosion

15.3 Glacial Deposition

15.4 The Pleistocene Ice Age

15.5 Plate Tectonics and Glaciation

15.6 Ice on Other Worlds

Key Terms

Key Concepts

Study Questions

Science Refresher: Air Temperature in the Lower Atmosphere

Living on Earth: The Origin of the Great Lakes

In Depth: Lake Missoula and the Channeled Scablands

CHAPTER 16

Deserts and Winds

16.1 The Origins of Deserts

16.2 Weathering and Erosion in Deserts

16.3 Wind in Deserts

16.4 Desertification: Natural and Human Induced

16.5 Deserts and Plate Tectonics

16.6 Deserts on Mars

Key Terms

Key Concepts

Study Questions

SCIENCE REFRESHER: Ocean Currents and the Coriolis Effect

IN DEPTH: Dust Devils

LIVING ON EARTH: The Dust Bowl

CHAPTER 17

Coastlines and Coastal Processes

17.1 Coastal Processes

17.2 Wind-Driven Waves

17.3 Tides

17.4 Coastal Erosion

17.5 Coastal Deposition

17.6 Coastlines

17.7 Coastal Management

17.8 Coastlines and Plate Tectonics

Key Concepts

Key Terms

Study Questions

SCIENCE REFRESHER: Wave Terminology

LIVING ON EARTH: Sea Level and Polar Ice

LIVING ON EARTH: Hurricanes and Storm Surges

IN DEPTH: Sea Level and Plate Tectonics

PART IV: EARTH'S RESOURCES

CHAPTER 18

Mineral Deposits and Industrial Materials

18.1 Consumption of Minerals and Industrial Materials

18.2 Metals and Metallic Minerals

18.3 Nonmetallic Minerals and Industrial Materials

18.4 Formation of Mineral Deposits

18.5 Plate Tectonics and Mineral Deposits

18.6 Mineral Exploration

18.7 Future Demands on Mineral Resources

Key Terms

Key Concepts

Study Questions

IN DEPTH: Mechanisms of Mineral Concentration

LIVING ON EARTH: The Environmental Impact of Mining

CHAPTER 19

Energy Resources

19.1 Energy Use

19.2 Petroleum - Oil and Natural Gas

19.3 Coal

19.4 Nuclear Power

19.5 Renewable Energy

19.6 Plate Tectonics and Energy Resources

Key Terms

Key Concepts

Study Questions

IN DEPTH: Correlation and the Search for Oil and Gas

LIVING ON EARTH: The Dilemma of Fracking

IN DEPTH: Is Ice That Burns the Fuel of the Future?

PART V: EARTH AND BEYOND

CHAPTER 20

Physical Geology and Climate Change

20.1 Taking Earth's Pulse

20.2 The Greenhouse Effect: A Matter of Balance

20.3 The Carbon Cycle

20.4 Climate Change: A Geologic Perspective

20.5 Earth-Sun Geometry

20.6 Feedback Systems

20.7 Plate Tectonics and Climate Change

20.8 Putting It all Together: The Greenhouse Effect and Global Warmth

Key Terms

Key Concepts

Study Questions

LIVING ON EARTH: Camels in the Arctic!

SCIENCE REFRESHER: The Physics of Global Warming

IN DEPTH: Melting of the Arctic Ice: An Omen of Global Warming?

Chapter 21

The Planets

21.1 Earth and its Moon

21.2 The Terrestrial Planets and Their Moons

21.3 Plate Tectonics: A Planetary Perspective

21.4 The Jovian Planets, Their Moons, and the Kuiper Belt

21.5 Asteroids, Meteors, Meteorites, and Comets

21.6 Exoplanets and Other Solar Systems

Key Terms

Key Concepts

Study Questions

Science Refresher: Center of Mass

In Depth: Martian Life on Earth?

Living on Earth: Visits from the Celestial Junkyard
